The Meaning of the Stones

Choice of 3 18kt golds, Yellow, Pink & White gold wishbone

The Original - Matt Oynx. Made from the finest quality natural Oynx. The gold is 18kt. Handmade in the E.U.

THE ORIGINAL - MATT OYNX

Black onyx is a semi-precious gemstone which is often used by jewelry designers because of its rich,

silky color and lustrous surface that adds an elegant touch to any design.

Onyx is a form of microcrystalline quartz known as chalcedony. This

stone is formed in the gas cavities of lava. Its chemical composition is SiO₂ with a hardness of 6.5-7. Black onyx is a type of agate, made of silicon and oxygen. It has a virtuous luster quality and a trigonal structure system.

Black Onyx is a stone used for protection from negative influences. It is helpful for people who need to release attachments to people, places or things. It is often cited in helping people to move past relationships after they have ended. It aids in confusing or difficult times, can absorb emotional intensity, repels negative energy and enhances self mastery. The ancient Egyptians believed that black onyx kept away unhealthy lovers and caused detachment.

Black onyx controls stress and can increase stamina. It is also known to aid in childbirth, sexual health and self-control. It is also said to strengthen the heart, kidneys, nerves, capillaries, hair, eyes and nails. Black onyx is also helpful in treating blood disorders, glaucoma and epilepsy as well as treating any teeth, bone, bone marrow or cell damage.

Onyx was very popular with the ancient Greeks and Romans. The Romans associated Black Onyx with courage.

Black onyx can be found naturally or dyed to appear more black. When people hear the term onyx they assume a reference to a black stone. However onyx can be brown, white, orange, red, honey colored or a blend of colors. If the stone is brown it is called sardonyx. If the stone is red, it is called Carnelian onyx. Only when the stone is black throughout is it referred to as black onyx.

- ♥ Self-control

Interesting Fact ?

The name comes from the Greek word 'onyx', which means nail or claw. The story is that one day the frisky Cupid cut the divine fingernails of Venus with an arrowhead while she was sleeping. He left the clippings scattered on the sand and the fates turned them into stone so that no part of the heavenly body would ever perish.

Adds strength and inner peace, helps us to confront our fears and allows us to see things in a positive way.

Lucky Brown - Tiger's Eye - Made from the finest quality natural tigers eye (Quartz) stone. The gold is 18kt. Handmade in the E.U.

TIGER'S EYE - LUCKY BROWN

The meaning of this stones name relates to its resemblance to the eye of a tiger or a cats eye. Tiger's eye is a very protective stone. It

has a powerful, dynamic energy with a watchful quality to it.

Specific colours of your tigers eye stone – from golden yellow to deep reds – will also express, in different degrees, a strengthening and grounding energy. Tiger's eye also has a mystical, opalescent quality to it, and the combination of solid black colour stripes with shimmering golds, browns and reds make for a very special stone indeed.

While it is not really classified as a quartz crystal, it could be said to be in the quartz family, as it is a variety of quartz with inclusions of fibers of gold asbestos which gives it the golden color. In common with quartz crystals, these stones are profound amplifiers of energy, and boost the energy of any other crystals you use it with. Tiger's Eye is black with iron oxide staining that gives the yellow and golden brown

stripes. Tiger's Eye has been used as protective stone against the evil eye and curses for ages. It is a combination earth and sun stone, so it strengthens self-confidence. Strong self-confidence will turn back any ill will. Tiger's Eye allows your insight to become stronger.

With its vibrant golden colour, tiger-eye is used to increase wealth and vitality. It enhances courage, brings passion and physical strength, and allows these attributes to be tempered with mental clarity and a joyful outlook.

As a power stone Tiger's Eye has a wonderful reputation for attracting wealth, money and luck. However it has some powerful spiritual uses as well. The liquid movement of light across the stone makes it an excellent tool for vision or divination work.

*The mother of the pearl, celestial nectar, sea foam.....
considered as the gem of love and prosperity.*

Pink Opal - Sweet Pink Shankla - Made from the finest quality natural opal stone. The gold is 18kt. Handmade in the E.U.

PINK OPAL - SWEET PINK

Opal was formed many millions of years ago, when a combination of silica and water flowed into cracks and spaces in the ground. This then

gradually hardened and solidified to become opal. Opal is a hardened silica gel, usually containing between 5-10% water. Therefore it is noncrystalline, unlike most other gemstones.

Precious opals occur in a great range of colour and varieties. White opal, black opal, fire opal, matrix opal, blue opal, Peruvian blue opal, pink opal...this list is extensive. The best pink opals, however, are found in Peru. They are a beautiful pale pink colour.

Pink opal is a stone of inspiration which enhances the imagination and fuels creativity as well. It helps one release inhibitions and enhances the memory.

Opal is also said to be a very spiritual stone, and can help one be "invisible" in situations where they don't care to be noticed. It has been known to bring happy dreams, and also to ease the process of change.

Pink opal clears and calms the heart and brings a sense of love, peace, and tranquility to one's aura. It can be used or worn to keep one's connection to the angelic realms open and clear. Pink opal is a lovely stone for healing the emotions, especially those connected with subconsciously held pain.

Pink opals are also associated with past lives and the world of dreams. They have often been used to stop nightmares. It is said that meditating and sleeping with pink opals help one resolve any painful remembrances, allowing a gentle and loving compassion for one's self. They are very helpful in relieving fear, worry, or anxiety; they are helpful in dissipating stress and allowing one to be more centred and calm.

Pink opal soothes the heart and physically has been known to stabilise any irregular heart beat. It supports the lungs and the utilisation of oxygen in the body. It is a gentle and loving stone for anyone dealing with respiratory issues.

Interesting Fact ?

A few years ago in 2008, NASA announced the discovery of opal deposits on Mars! Since opal is made up of mostly water this means that Mars may have been wet for billions of years than previously thought which indicates it may have supported life.

Helps to find peace of mind. Essential in our daily routine, this gem gives positive strength and helps find peace of mind.

Magic Blue - Lapis Lazuli - Made from the finest quality natural lazuli stone. The gold is 18kt. Handmade in the E.U.

MAGIC BLUE – LAPIS LAZULI

Lapis lazuli is a gemstone of the kind that might have come straight out of the Arabian Nights: a deep blue with golden inclusions of pyrites

which shimmer like little stars.

The euphonious name is composed from 'lapis', the Latin word for stone, and 'azula', which comes from the Arabic and means blue.

Lapis lazuli is regarded by many people around the world as the stone of friendship and truth, it strengthens love and emotional ties. The blue stone is said to encourage harmony in relationships and help its wearer to be authentic and give his or her opinion openly.

Lapis lazuli is an opaque rock that mainly consists of diopside and lazurite. It came into being millions of years ago during the metamorphosis of lime to marble. Uncut, lapis lazuli is matt and of a deep, dark blue colour, often with golden inclusions and whitish marble veins. The small inclusions with their

golden shimmer, which give the stone the magic of a starry sky, are not of gold as people used to think, but of pyrites. Their cause is iron. The blue colour comes from the sulphur content of the lazurite and may range from pure ultramarine to a lighter blue. At between 5 and 6 on the Mohs scale, this stone is among the less hard gemstones.

As they did more than 5000 years ago, the best raw stones still come from the steep Hindu Kush in the north-east of Afghanistan. The lumps of blue rock, extracted from the inhospitable mountains by blasting, are brought down into the valley in the summer months by mules.

Lapis lazuli is a versatile and popular gemstone which has shown extraordinary stability in the turbulent tides of fashion. No wonder, since it has fascinated both men and women for thousands of years with its fabulous colour and those golden points of light

Interesting Fact ?

Ground up into a powder and stirred up together with binding-agents, the marble-like gemstone can be used to manufacture radiant blue watercolours, tempera or oil-paints.

Powdered Lapis was used as eye shadow by Cleopatra and many of the blues used in Medieval manuscripts and Renaissance art were derived from Lapis pigments.

*Strengthens love and emotional ties while improving blood circulation.
If you are a Sagittarius, it helps you establish order in your life.*

Choice of 3 18kt golds, Yellow, Pink & White gold wishbone

Fresh Mint - Chrysoprasus Opaque - Made from the finest quality natural Chrysoprasus stone. The gold is 18kt. Handmade in the E.U.

FRESH MINT - CHRYSOPRASUS OPAQUE

Made of CHRYSOPRASUS, Greek chrysoprasos, the tenth foundation stone of the celestial Jerusalem. It is a kind of green agate,

composed mostly of silica and a small percentage of nickel.

This opaque gemstone variety of chalcedony owes its lively hue to the small quantities of nickel. Find this stone in tints ranging from apple-green to deep green. The darker varieties of chrysoprase are also referred to as prase. It also may be a reference to the wondrous fertility which is evident through heaven and earth.

Chrysoprase is an attractive gem and semi-precious stone. Chrysoprasus was used by the Greeks, Romans, and the Egyptians in jewelry and other ornamental objects and because of its semi-opaque green color, it is often mistaken for Imperial jadeite.

Chrysoprase is prized for its color and rarity and is said to be the favorite gemstone of Alexander the Great. It has been known and mined in Europe since the 14th century and was extensively

used in the 17th and 18th centuries to make jewelry, church utensils, Florentine mosaics, and inlays. The largest deposit now being worked is at Marlborough in Australia.

Not relegated to artsy-craftsy cottage industry jewelry makers, this verdant stone can be accented with quality diamonds, and mounted in fine karat gold. Like other opaque stones, veining and slight differences in color make this gem as unique as the designer who works it into an original design, like the flip flop pendant you see here by Shankla. Each stone is unique because of its mix of nickel and silica.

More and more Jewellers are seeing the wisdom in adding opaque stones to their inventory. So, customers with a yen for the unconventional yet beautiful jewel will be able to consider these stone as precious individual pieces. And since Pantone, Inc. pronounced the upbeat emerald green as the color for 2013, it's the ideal time to wear this gem.

- ♥ Appreciation of nature

Interesting Fact ?

According to legend, Alexander the Great always wore a girdle into battle that was embedded with a bright chrysoprase stone. On his return from a successful campaign in India, he laid aside his girdle to bathe in the Euphrates River. While the girdle lay unattended, a serpent came and bit off the stone and dropped it into the water. Alexander III didn't win another campaign after loosing this precious talisman.

As her twin sister, it has the same relaxing properties & is considered the tenth precious stone among the twelve existing ones.

Red Passion – Cornelian. Made from the finest quality natural Cornelian. The gold is 18kt. Handmade in the E.U.

RED PASSION – CORNELIAN

Cornelian is the name given to a specific colour of agate. The word cornelian comes from the latin word for flesh (carnis). It applies to any agate that is red to dark orange to brownish in colour.

Sometimes referred to as cornelion, it is found primary in India, and various sites around South America. Also found in Brazil, Australia, Russia and the US. Cornelian is a variety of chalcedony.

A moderately hard stone that is capable of taking a hard polish.

Used for thousands of years – from the Egyptians, who filled tombs with cornelian, as they thought it had great power, and would help the souls journey to the afterlife.

Cornelian aids in understanding the inner self and strengthens concentration. It helps one to overcome the fear of public speaking, increases the self worth, and is a fast acting stone to succeed in one's career.

Cornelian is said to assist in stimulating creativity. It seems to have a clearing effect, dispelling negative energies as it replaces them with positive ones.

This can make it easier to find direction, and its grounding effects can make it easier for you to feel in control of your life. This makes cornelian a good stone for people who feel like they are going nowhere.

Cornelian balances creative and organization abilities, opens doors and creates a need to follow through on plans. Wear this stone to prevent other people from reading your thoughts or from dark forces attempting to influence your mind.

There are quite many ancient beliefs associated with Cornelian, which centered around protection during travels after death and against evil.

It is said that this stone will help cleanse and purify the blood, thus giving more physical energy.

It is used to counteract doubt and negative thoughts, and can also be used in spells relating to these problems. It may confer patience.
